**Reporting of Infectious Disease**

At present, different kinds of orientation activities are being carried out in the University. For the health of everybody, please be reminded to be alert for any sporadic occurrence of infectious disease among your group by the following ways:

- Monitor the sick leave record of your staff / participants.
- Watch out for occurrence of a cluster* of illness.
- Inform UHS by telephone at 3917-2514 or email uhealth@hku.hk when the following situation arises:
  - A cluster of staff / students in the same area develops similar symptoms concurrently OR within a short period of time.
  - There is a confirmed notifiable communicable disease, as informed by the Centre for Health Protection or a local hospital in Hong Kong.

*A “cluster of illness” means 3 or more persons in the same area developing similar symptoms within a short period of time.

For information regarding preventive measures, please note the  [Guidelines on Disease Prevention in Mass Gatherings](#).
