To: All Eligible Users of University Health Service

**Quadrivalent (4 in 1) Seasonal Influenza Vaccination**

The annual seasonal influenza vaccination season is coming!

University Health Service recommends all university members to have the seasonal influenza vaccination.

Annual seasonal influenza vaccination is a safe and effective way of prevention. It protects yourself and the community

Vaccine Effectiveness: 70 - 90% for age < 65, when the vaccine strains closely match the circulating influenza viruses

It takes about 2 weeks for sufficient antibodies to develop after vaccination.

**Schedule for Quadrivalent (4 in 1) Seasonal Influenza Vaccination**

All eligible university members can have the vaccination at UHS. Details as below:
